

SxS media not included.

***An SxS solid state recorder designed to work exclusively with JVC's ProHD!***

**Now you can record HD video in the popular XDCAM EX™ format using your 200 Series ProHD camcorder. This compact recorder attaches directly to the GY-HD200UB or GY-HD250U recorders via the KA-UM100 adapter and lets you record HD material in the 720P or 1080i (GY-HD200UB only) mode onto convenient SxS memory cards. Simultaneous recording to tape and solid state memory is also possible allowing you to make instantaneous backup or archival recordings. The compact KA-MR100G provides status information on its built-in LCD screen as well as on the camera's viewfinder. Controls and menus are well integrated with the attached camera. You can even play back recorded video directly on the camera's LCD monitor or viewfinder.**

- Records on standard SxS memory cards. No moving parts!
- Records native XDCAM EX™ .mp4 files\* for versatile workflow options
- Recording modes
  - 1080i60/50(25Mbps/CBR)(GY-HD200UB only)
